

## CHIREDDZI RURAL DISTRICT COUNCIL

# Buffalo Range Residential stands projects takes

Chiredzi RDC is about complete its enormous US \$7 million residential stands scheme at Buffalo Range, some 20km from Chiredzi Urban. The project encompasses medium and low residential land developed to the strictest standards of modern planning.

### Buffalo Range road construction

- **Buffalo range housing project– Road formation and construction**

Road formation and bush clearance is going on. Opening of roads and bush clearing at the 1200sqm stands is now complete.

- **Construction of roads under phase 1**

The winning tenderers were cancelled after council realized that the winning bidders had falsified their figures. Council is now implementing the project using its service equipment procured and hiring out some equipment where it is in deficiency. The total station survey equipment was procured that will assist in executing the project and other council topographical surveys works

Whilst the department is waiting to receive training to use the total station, stock piling for gravel mobilisation has already started.

- **Buffalo range water project**

After exploring a number of many alternative options Chiredzi RDC has finally settled on the first option of using the existing Zinwa plant pumping station to connect water to phase one of the scheme.
